SUMMARY

Senior Front-End Developer with **6+ years** designing and building web and mobile applications in **React.js, Next.js and TypeScript**, with a strong eye for clean UI, responsive design and scalable front-end architecture. Most recently at **PTway** I led the front end of **Taawoni**, a training-opportunity platform, and a **Saudi Ministry of Industry** system. My work spans booking and ordering platforms, e-commerce, **POS systems and real-time dashboards**, and **React Native** apps. Full-stack roots in **Django, Node.js, GraphQL and PostgreSQL** help me work closely with back-end teams and deliver reliable, production-ready code.
